CERTIFICATIONS & EDUCATION

CCNA | Security+ | Network+ | A+ • MA Adolescence Education, BA English — SUNY New Paltz, NY

PROFESSIONAL EXPERIENCE

Network Specialist (Security Operations) — Southern Westchester BOCES | Harrison, NY

Mar 2026 - Present

Tools: CrowdStrike Falcon EDR/SIEM/SOAR, Stellar Cyber SIEM/XDR, Check Point Harmony, Tenable Nessus

- Serve as a core member of a 3-person Security Operations team within an MSP supporting K–12 school districts, helping establish and mature incident response processes, investigation workflows, and cybersecurity service offerings.
- Conduct cross-platform investigations by correlating data from SIEM, EDR, and email security tools to validate alerts and document incident findings for district review and regulatory obligations.
- Develop investigation workflows, process improvements, and response playbooks that streamline incident analysis, standardize response procedures, and enhance detection capabilities.
- Partner with internal teams and third parties to perform vulnerability assessments, support SOC 2 audit activities, coordinate penetration testing, and drive NIST-aligned remediation efforts.
- Perform proactive threat hunting across SIEM, EDR, and email security platforms to identify suspicious activity, investigate potential threats, and improve detection coverage.

Junior Network Specialist — Insight Global (Contract through SWBOCES) | Valhalla, NY

Oct 2025 - Mar 2026

- Supported district-wide network operations in a K–12 environment, managing ServiceNow incidents and providing Tier 1–2 troubleshooting across endpoints and network infrastructure.
- Resolved WAN/LAN connectivity, NTP synchronization issues, Cisco Catalyst switch failures, and VLAN mismatches; managed user and device administration via AD Manager, Jamf, and Google Admin Console.
- Conducted network and facilities audits, including MDF/IDF topology surveys, port density documentation, UPS battery maintenance, and proactive monitoring of network health using SolarWinds Orion.

Computer Aide (IT Support) — The Public Schools of the Tarrytowns | Sleepy Hollow, NY

Feb 2024 – Oct 2025

- Delivered end-user support across Windows, macOS, and ChromeOS, managing incidents in ServiceNow.
 - Assisted with infrastructure and security initiatives, including firewall cutover validation, 911 call routing tests, MFA rollout user support, and device enrollment for Google Workspace domain consolidation.
 - Managed endpoint operations at scale, including Windows 11 imaging and deployment, Chromebook asset lifecycle tracking, vendor coordination, and secure device decommissioning.
-

PROJECTS

Additional projects and documentation available at: codywimbert.github.io

- **Security Operations Lab Environment (Proxmox / OPNsense)** — Built and maintained a segmented virtual network using OPNsense (routing, firewall, VPN), Proxmox (VM/container hosting), Pi-hole (DNS filtering), and Wazuh (SIEM, security monitoring), with controlled remote access via Twingate ZTA and firewall rules.
- **Active Directory Deployment & Security Monitoring** — Deployed Windows Server 2022 AD DS with DNS/DHCP/NAT; automated provisioning of 1,000+ simulated users via PowerShell and Group Policy; integrated Splunk on an Ubuntu VM to analyze security logs generated from simulated brute-force attacks.
